# INTRODUCTION

---

This Financial Assurance Estimate (FAE) is prepared in accordance with the California Surface Mining and Reclamation Act (SMARA) requirements for provision of financial assurance to ensure reclamation is performed in accordance with the approved reclamation plan (PRC § 2773.1(a)). FAEs typically address the existing conditions and planned activities over the next approximate year (as specified in PRC § 2773.3), based on the reclamation goals and activities provided in a reclamation plan approved in 1983, as amended by Sanata Clara County's approval of the Stevens Creek Quarry Reclamation Plan Amendment as discussed below.

Santa Clara County approved the Reclamation Plan Amendment in May 2009. The Reclamation Plan Amendment added approximately 12 acres to the Reclamation Plan to encompass areas east and west of Parcel B. As discussed above, FAEs are required to cover existing disturbances as well as planned disturbance over the next year. In this FAE, however, Stevens Creek Quarry (SCQ) decided to prepare an estimate for all existing disturbance plus the effort needed to reclaim the entire amended acreage. This gives assurance to the owner of the amendment area that the FAE, and associated bond, will cover reclamation of all the acreage of the amendment area as well as the disturbed acreage on SCQ property. Thus, the FAE amount estimates efforts above and beyond SMARA requirements.

## **CURRENT STAUS**

Stevens Creek Quarry has been in operation for over 50 years . The quarry configuration and surrounding surface disturbance are well established and have remained virtually unchanged for decades, as the materials are mined from increasing depths within the quarry. Santa Clara has recognized the quarry's vested right to continue its surface mining operation.

## **RECLAMATION GOALS AND SURFACE TREATMENT**

In accordance with the approved Reclamation Plan, reclamation will leave the site in a stabilized open condition. Soils are generally lacking due to the long history of pre-SMARA surface disturbance where no stockpileof soils occurred. Reclamation tasks would involve removal of mining equipment, surface grading, seeding for erosion control, and planting of container plants. Specific areas and acreages are described below.

## Quarry

Final excavation grades have not been reached in any of the quarry areas. Active slopes have been mined in a conventional hard rock configuration with highwalls, some overall slopes (i.e., the west slope) appear to meet the average grades of the approved plan, while others (i.e., the east slope and north slope) are steeper than the final planned grade and would require cut or fill to meet final grade. The cost to reconfigure these highwall slopes by cut and fill is included within the estimate.

## Revegetation

Revegetation at this site is aimed at controlling erosion as an Open Space site until such future time that the site is developed for subsequent land uses. Cluster of trees will also be planted on slopes.

## Structures and Equipment

Structures and equipment at the quarry are very limited. A primary crusher is in place within the quarry, as well as its system of screens and conveyors. The system is mobile and readily disassembled for removal and sale. The estimate includes costs for removal of the crushing unit, and disposal of concrete.

## SECOND USE STRUCTURES

Parcel A contains administrative offices, maintenance shops, and related structures. This parcel is separately permitted to recycle construction materials, an activity that will continue subsequent to completion of the mineral resource extraction and reclamation. The structures and related paved surfaces would therefore remain following reclamation.

## COST ESTIMATING

Financial Assurance Estimate calculations are contained in the following section of this report. The format and calculations follow the State Mining and Geology Board's *Financial Assurance Guideline*. Equipment rates used are based on California Department of Transportation Division of Construction *Labor Surcharge and Equipment Rental Rates* and Stevens Creek Quarry's *Standard Equipment List*. Equipment usage and efficiency are based on the *Caterpillar Performance Handbook*. Acreage for grading and revegetation surface treatment reflect the

## RECLAMATION OBJECTIVE: OPEN SPACE

## 1.0 PRIMARY RECLAMATION ACTIVITIES

## TASK 1.1 - GENERAL GRADING (UPPERSLOPES, QUARRY FLOOR, AND STOCKPILE AREA)

**Method:**

Approximately 50 acres of floor, 11 acres of stockpile, 10 acres of process acres of slope (level to gently sloping land).  
Please see Figure 2, "Grading and Revegetation."

**Miscellaneous Information:**

Caterpillar D8R Dozer with a 14' blade (2-ft overlap); Avg. Speed 2.5 mph; 50 minute hours; Production Rate 3.0 acres/hr.

**A. Equipment List**

Equipment	Quantity	\$/Hour	Total Hours	Cost (\$)

## TASK 1.2 - GRADE ACTIVE QUARRY SLOPES (QUARRY HIGHWALL) TO MEET FINAL RECLAMATION SLOPE ANGLE(S)

### Method:

Caterpillar D8R Dozer will contour cut slopes to rough grade at 1.5:1; fill slopes at 2:1.

### Miscellaneous Information:

10 acres x 25-ft avg. depth = Approx. 484,000 cu. yds. Caterpillar D8R Dozer: Production Rate 750 cu. Yds./hr. (Avg. Dist: 50-ft; Operator: Avg.; Material: varies; Efficiency: 50 min. hr.).

## 2.0 REVEGETATION

### TASK 2.1 - REVEGETATE DISTURBED SURFACES

**Method:**

Quarry slope revegetated for erosion control, plus container trees for aesthetics. Quarry floor surfaces revegetated for erosion control, pending establishment of subsequent land uses. Straw mulch and hydroseed disturbed surfaces (117.8).

**Miscellaneous Information:**

117.8 Acres @ \$1,320/acre includes labor and material. Assume follow-up seeding (year 2) will be required on 10% (12 acres) of site. Stevens Creek Quarry has an inventory of over 1,000 native oak trees ready to plant. Labor: 0.25/hr/unit.

**USER'S GUIDE  
FOR LABOR SURCHARGE AND EQUIPMENT RENTAL RATES  
April 1, 2014 - March 31, 2015**

Equipment Rental Rates are available on the Internet at:

<http://www.dot.ca.gov/hq/construc/equipmnt.html>

Miscellaneous Equipment Rental Rates are available on the Internet at:

<http://www.dot.ca.gov/hq/construc/misceqrr/index.htm>

The miscellaneous listing is updated daily.

## **Changes**

**Books are no longer available in hard copy and should be downloaded from the internet and printed.**

Changes to the equipment rates in the April 1, 2014 book are the result of: 1) fuel costs decreased; 2) interest rates increased; 3) Producers' Price Index increased; 4) no change in sales tax; and 5) no change in freight (F.O.B.) rates.

## **Labor Surcharge**

The labor surcharge compensates the contractor for statutory payroll items stipulated by various governmental agencies. The six items included are worker's compensation, social security, Medicare, Federal unemployment insurance, State unemployment insurance, and State training taxes. The general rate is an average of the job classifications common to Caltrans projects. The labor surcharges in the April 1, 2014 book are the result of changes in worker's compensation rates. The rates were derived from using the pure premium rate approved by the Insurance Commissioner effective January 1, 2014 and increasing it by the historical statewide average expense. In the calculation of the labor surcharge for overtime work, the worker's compensation is not included on the premium portion of overtime, as provided by worker's compensation regulations.

The surcharge percentage to be applied to the actual wages paid as provided in Section 9-1.04B [9-1.03A(1b)] of the *Standard Specifications* will be **12 percent for regular time (RT) and 12 percent for overtime (OT)**.

Exceptions to the general rate are listed below. These classifications were chosen because of high worker's compensation insurance costs. Forward questions, regarding worker's compensation rating and proper labor surcharge usage, to the rental rate personnel in the Division of Construction.

## **EXCEPTIONS**

An appropriate labor surcharge will be established by the Division of Construction for work that is determined by the resident engineer to be covered by Longshoreman and Harbor Worker's Act.

## Background

By the authority described in Section 9-1.04 [9-1.03A] of the *Standard Specifications*, compensation for work paid by force account is determined to be the total of the direct equipment costs (rental rate) plus a 15 percent markup for all overhead not included as direct costs. The direct costs include fuel, oil, lubrication, supplies, small tools, necessary attachments, repairs and maintenance, depreciation, storage, cost of facilities capital, overhaul and all incidentals. The labor costs required to provide the above listed items are also included. The operator cost is not included in the equipment rate.

The calculated rate represents the cost of owning and operating the equipment, which is likely to be lower than the rate charged by a rental yard. The rental yard rate may include additional overhead and profit as well as a premium for short-term rentals. In certain situations, factors are applied to the calculated rates to provide ownership-only rates for delay situations or operating-only rates for overtime situations. The rates are calculated using factors for the direct cost items described above. The factors represent an average and are applied to all makes and models of equipment within the class. **All rates are hourly, unless stated otherwise.**

## Overtime and Multiple Shifts

Certain equipment costs are fixed on an annual basis, no matter how many hours are worked. Once an estimate of the costs and hours of use is made, a rate can be determined. When more than the estimated number of hours are worked (Overtime or Multiple Shift), a duplication of payment occurs on the fixed cost portion of the equipment rate.

In order to avoid this duplication, Caltrans uses a reduced rate for the Overtime or Multiple Shift situations. The definition of Overtime or Multiple Shift periods is:

**Overtime hours occur after the equipment has worked at force account, eight hours per day (or after the daily equivalent of forty hours per week for special work schedules - 4/10 or 9/80). Multiple shift hours will be paid at the same rate as overtime hours.**

The hours shown on the Daily Extra Work Bill will determine when the Overtime and Multiple Shift is to be used. **When the hours worked on force account are eight or less, straight time rates will be used.** When the hours worked on force account are more than eight, Overtime and Multiple Shifts rates will be used. Saturday, Sunday or holiday work will be paid at the overtime rate except in those cases where these days are considered working days in the special provisions.

Be advised the computed overtime rates are no longer rounded and now equal the product of the straight time rate and overtime factor. The Overtime and Multiple Shift Factors are recalculated annually to reflect changes in the operating costs.

## Delays

As described in Section 8-1.07C [8-1.09] of the *Standard Specifications*, the Delay Factor may be applied to the equipment rental rate. The Delay Factor may be the basis for compensation for idle equipment time on an excusable delay. The factor has been calculated to include the ownership costs without including operating costs. The Delay Factor recovers all the contractor's non-operating costs in an eight hour day. If payment is made for equipment on an excusable delay, it is limited to eight hours per day or forty hours per week maximum.

The NONOP class for non-operated items and the TRAFc class for traffic safety devices have been separated from traditional "rolling stock" equipment when calculating the Delay Factor. These classes are comprised of items whose depreciable lives are related to the number of uses per year, rather than the number of hours per year. Accordingly, the reasonable compensation for the contractor's actual loss has been estimated to equal the cost of facilities capital. **It should be recognized that these items must be out of service before the Delay Factor is applied. For example, if work behind K-rail is delayed, the K-rail should be paid straight time until it is no longer controlling traffic.**

Any use of this factor must have the prior approval of the resident engineer. The Delay Factor is recalculated annually to reflect changes in the operating costs.

## Use of Daily Extra Work Bill

Identification codes and rates are intended to be used with the Department's Internet change order billing system. The class is abbreviated using a 5 digit alpha-code, the make (manufacturer), a 4 digit alpha-code, and the code a 7 digit alpha-numeric code. All three codes must be used to define the equipment when using the automated pay system. Since the majority of items are described by per hour rates, each line has an entry for hours with an allowable maximum of 24. Special items with other than hourly rates should be appropriately checked and then entered in the Regular Hours column. For example, 50 Traffic Cones used 3 days (converts to 1.5, 100-cone-days) requires 1.5 be entered in the Regular Hours column. Note that any entry in the Delay Factor column will automatically apply the Delay Factor to every equipment entry on the current report.

Whenever an identification code cannot be found or the rate for a particular date of work performed is not available, updated information should be requested from the resident engineer. It is the resident engineer's responsibility to establish rates for equipment not found in the *Labor Surcharge and Equipment Rental Rates* publication. Support for this determination is available from both District and Headquarters Construction Offices. **Rates are regularly superseded during contract periods, so avoid the use of old publications or expired rates.**

The equipment is presented with a standard configuration capable of performing work commonly encountered on Caltrans projects. Special attachments or accessories are described under the classification heading in the *Labor Surcharge and Equipment Rental Rates* publication. Attachments other than those described by these remarks will be paid only upon direction of the resident engineer.

# EQUIPMENT RENTAL RATE

NOTE--THE FOLLOWING RATES ARE IN EFFECT FROM APRIL 1, 2014 THROUGH MARCH 31, 2015

## ATTACHMENTS

TRACTOR ATTACHMENTS -including power control units and accessories necessary to provide a functional attachment. Dozer blades are included in the standard configuration for both crawler and heavy, rubber tire tractors. Rippers are listed from R1 to R8 and Winches for logging or towing are listed from S1 to S5. Equipment model groups are as follows:

1. Case 300 Thru 800 Series, Cat D-2 thru D-4, Deere 400 & 450, Dresser TD-7, TD-8 and TD-9, Fiat-Allis FD-5 Thru FD-7, Komatsu D21E Thru D37P, Liebherr PR711 & PR721.

## AIR COMPRESSOR

[ AIRCP ]

**DELAY FACTOR = 0.12**

**OVERTIME FACTOR = 0.90**

All types of self contained units, regardless of power (gas, diesel and lpg) or type of compression (reciprocating, screw and vane). The listed rates include 15.2 meters (50 lineal feet) of hose, all hose whips, fittings, couplings and any compressor attachments. Listed in accordance with mfr's rated capacity in liters per second (cubic feet per minute) at 7 bar (100 psi).

**NON-OPERATED EQUIPMENT (DAILY [ NONOP ] RATES)**

**DELAY FACTOR = 0.54 OVERTIME FACTOR = 1.00**

Note various units for different items. The following allowance is entered on the extra work bill by using the (unit listed x number of days) in the hours worked column. The following list is limited to items with long estimated lives. Additional traffic related items such as cones and barricades, are still listed under TRAFIC in this publication. Other non-operated items with short estimated lives should be treated as materials and should not be "rented". Non rented items are 1) intended to be job specific (amortized over the life of the project) and 2) have an estimated life measured by number of uses rather than a length of time.
