This is a list of CEGs who are licensed by the State of California (Board of Registration of Geologists) and have indicated a willingness to provide services to owners of single-building site properties. This list is made available to help facilitate applicants in contacting consulting geologists who can provide reports needed to satisfy the County's Geologic Hazards Ordinance and County Geologist's requirements. The County of Santa Clara does not recommend any specific geologist or company on the list and applicants may utilize the services of a California CEG who is not on the list to satisfy County requirements.
