The trustor hereby requests that a copy of any notice of default and a copy of any notice of sale under this deed of trust be mailed to trustor at the address given hereinafter.

IN WITNESS WHEREOF, the trustor has executed these presents.
The address of said Trustor is: Signature of Trustor
703 Addison, Palo Alto, Dorothy Geddes
703 Kingsley, Palo Alto, Effie Geddes
California

STATE OF CALIFORNIA)
COUNTY OF SANTA CLARA)
On this 11 day of July, nineteen hundred and forty-
three, before me, J.C. Freedman, a Notary Public in and for said County of Santa Clara,
residing therein, duly commissioned and sworn, personally appeared Dorothy Geddes and
Effie Geddes, known to me to be the persons whose names are subscribed to the within
instrument, and acknowledged to me that they executed the same.
IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal, in the
County of Santa Clara, the day and year in this certificate first above written.
J.C. Freedman, Notary Public in and for the County of
Santa Clara, State of California

DEED
THIS INSTRUMENT, made the 2nd day of July, 1943, between William L. McLaine and C.B. Lamberton, as Executors of the last will and testament of Mary Ives Crocker, deceased, the Grantors, and Permanent Cement Company, the grantees;
WITNESSETH: That whereas, said Mary Ives Crocker was on the date of her death the owner of that certain parcel of land hereinafter described; and
WHEREAS, the Grantors did thereafter file in the Superior Court of the State of California, in and for the City and County of San Francisco in the probate proceeding entitled In the Matter of the Estate of Mary Ives Crocker, deceased, their Return on the sale of said land, and their Petition for Confirmation thereof; and
WHEREAS, the said court did by its decree duly given and made on the 28th day of June, 1943, duly confirm said sale;
NOW, THEREFORE, in consideration of the sum of Seven Hundred dollars (\$700.00) lawful money of the United States to and in hand paid by the Grantees, receipt of which is hereby acknowledged, the said Grantors do hereby grant unto the said grantees, that certain real property situate, lying and being in the County of Santa Clara, State of California, and more particularly described as the north half of the northeast quarter of the northeast quarter of Section 19, Township 7 South, Range 2 West, Mount Diablo Base and Meridian, and containing therein, according to the official survey of said Section 19, 20 acres more or less.
TO HAVE AND TO HOLD unto said grantees, its successors and assigns forever, reserving nevertheless, to the said grantors as such executors, all oil, gas and mineral existing on said premises with right-of-way and other easements necessary to the commercial exploitation of any or all said oil, gas or minerals, it being understood however, that the said grantees, its successors and assigns are to be reimbursed for actual damages suffered through operations, and it being further understood that said reservation shall last only for a period of twenty years from the date hereof, except that Grantors, their successors and assigns shall have the privilege of working to exhaustion any mine or well which is being worked at the termination of said period.
IN WITNESS WHEREOF, the said grantors have executed these presents the day and year hereinabove first written.

William L. McLaine
C.B. Lamberton, Executors of the last will and testament
of Mary Ives Crocker, Deceased.

STATE OF CALIFORNIA)
CITY AND COUNTY OF SAN FRANCISCO)
On this 2nd day of July, in the year one thousand nine
hundred and forty-three, before me, Laura E. Hughes, a Notary Public in and for the City
and County of San Francisco, State of California, residing therein, duly commissioned and
sworn, personally appeared C.B. Lamberton, Executor of the last will and testament of Mary
Ives Crocker, deceased, known to me to be the person whose name is subscribed to the
within instrument, and acknowledged to me that he executed the same, as such executor.
IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal, in the
City and County of San Francisco, the day and year in this certificate first above written.
Laura E. Hughes, Notary Public in and for the City and
County of San Francisco, State of California

My commission expires March 3, 1946

June 1939 Stanford University Report

C. F. TOLMAN
STANFORD UNIVERSITY
CALIFORNIA

June 18, 1939

The Permanente Corporation
1522 Latham Square Building
Oakland, California

Gentlemen:

At your request I submit the results of our sampling of a portion of the Permanente limestone, situated on the southern slope of Bald Peak and on the northern slope of Permanente canyon. The area sampled lies above the 1500 foot level, and also above the mass of Franciscan sandstone and volcanics which separates the great limestone body into two portions. The area sampled covers the Southeast Quarter of Section 18, Township 7, South, Range 2 West and does not include large and easily available bodies of high grade limestone north and east of this area nor the large mass of limestone below the 1500 level on the northern slope of Permanente canyon, nor the mass of limestone south of Permanente Creek. These three additional areas contain large tonnages of high grade "dark" limestone.

The area sampled and the areal extent of the entire body of Permanente limestone is shown on the Location Map accompanying this report.

The present preliminary report is accompanied by the following photographs, maps and tabulations:

Page 3: "By far the largest and most important of [S.F. Bay Area] deposits is the Permanente limestone mass."

Page 4: "[A] large additional tonnage of available limestone...occurs...on the mountain slopes south of the creek."

MAP AREAS:

9

AREA 1

Area 1 was mapped primarily by E. Mathieson and J. Tal.

Structure

Outcrops in the Black Mountain area, as in most of the Permanente property, are rare. Bedding attitudes have no systematic pattern. The large-scale structure appears to consist of wide northwest-trending bands of Franciscan volcanics separated by wide shear zones. The shear zones contain large, resistant blocks of limestone that form ridge-top outcrops. There are few outcrops of other rock types.

Limestone

The southwest corner of the property contains many prominent but scattered limestone outcrops. Some occur as large ridge-top or hillside exposures, but many are small and isolated.

K. E. Grimm, who was the chief geologist for Permanente Cement Company in the early 1940's, conducted an exploration program in the Black Mountain area. His reports (Grimm, 1943, 1945) were based on extensive surface mapping, trenching, and drilling. Grimm concluded that the outcrops are "local isolated remnants of an earlier larger mass." Our field work confirmed that the outcrops are isolated, but they probably are small fault blocks within a shear zone rather than erosional remnants of a large ridge-top body of limestone. The blocks of limestone probably are separated by a less-resistant matrix of sheared volcanics, sandstone, limestone, and chert. Such "melange" zones are characteristic of the Franciscan assemblage.

Grimm (1945) recognized limestones of two different ages in the Black Mountain area. He used microfossils to correlate the younger limestone with the "upper light" (low grade) limestone at the Permanente quarries. We were unable to distinguish limestone of different ages.
