RE: Statement of Justification for Proposed Grading Modification
19800 Old Santa Cruz Hwy, Los Gatos (APN 558-41-020)

Dear Sir/Madam:

This proposed Grading Modification is an adjustment to allow for the retention of 770 cubic yards of cut on site. This soil is spread over the landscape area east of and adjacent to the residence and guest house. The increase of fill (770 cu. yds) over this relatively flat area is to eliminate unnecessary and environmentally undesirable long-distance export. Improvements are designed to conform with the natural terrain and existing topography of the site and conform with the adopted Grading Ordinance.

Very truly yours,

Daniel Nunes, P.E.
RCE 76449 EXP. 12/31/20
