RE: Septic site survey, 21690 Shillingsburg, San Jose, CA

Thank you for providing Method Construction, Inc. with the opportunity to provide you with a site survey to determine suitability of installing new septic systems at the above referenced property.

I have walked and looked at the above referenced site and surrounding areas. I believe the site is generally suitable for at least 8 new septic systems. I have recently, successfully installed systems in this area and find this site to be similar.

If you have any questions please call me at the number below.

Sincerely,

David Method
