#### WELO COMPLIANCE

This project has been designed to conform with the State's Model Water Efficient Landscape Ordinance

IRRIGATION DESIGN

The irrigation on the site will use drip irrigation, will meet the City's requirements, and will comply with the requirements of WELO. Equipment will include dedicated irrigation meter, smart controller, weather sensor, and efficient irrigation emitters, nozzles, and other equipment.

PLANTING DESIGN

The landscape design uses water-wise plant species suitable for this region and that are low maintenance and durable, uses trees to shade paved areas, and plants have been grouped into hydro-zones. References used for the landscape design include published information from the local jurisdiction, Sunset Western Garden Book and WUCOLS.

#### LANDSCAPE AREA CALCULATIONS
