The Stanford San Juan Residential Neighborhood identified in the Historic Study, prepared by Environmental Sciences Associates (ESA), Building Permits for structures 50 years old or more (potential historic buildings), which are not deemed a Small Project by the County Department of Planning and Development (Department), will follow the steps outlined below for obtaining a building permit.

**Step 1: Stanford Faculty Staff Housing Office (FSH) Review**
Stanford FSH office staff will conduct an assessment to determine, in writing, if a project qualifies or not, as a Small Project. FSH will notify the applicant if an Historic Significance Assessment (HSA) is needed and, as applicable, if an alteration/addition is required to conform with the Secretary of Interior’s (SOI) Standards.

**Step 2: Historic Significance Assessment (HSA) & Secretary of Interior (SOI) Documentation.**
If an Historic Significance Assessment (HSA) & Secretary of Interior (SOI) Documentation is required, the Applicant/Agent shall hire an Architectural Historian to:

A. Prepare a Historic Significance Assessment (HSA) for the residence and;
B. Review and confirm that the Alteration/Addition design will conform with the Secretary of Interior’s (SOI) Standards if the residence is determined to be historically significant.

The Department will publish a list of qualified Architectural Historic consultants that can prepare an HSA for use by applicants.

The Architectural Historian will complete an HSA to determine if the residence is a historic resource and if it is eligible to be listed on the Heritage Resources Inventory (HRI) list. The HSA report shall be comprehensive and include a recommendation on whether the structure is eligible to be listed on the HRI. If the residence is eligible to be listed on the HRI, the applicant should ensure that the alteration/additions proposed conforms with the SOI standards.

If the Architectural Historian determines that the residence is not historically significant, a peer review of the HSA, at the applicant’s cost, may be requested prior to submittal of the permit application.

**Step 3: Permit Application Submittal.**
The applicant shall submit the building permit application, the HSA report, and a letter from Stanford FSH Office confirming that the project does not qualify as a small project.

**Step 4: Peer Review of the HSA & SOI Additions/Alterations.**
A Peer review of the HSA report & the SOI-based changes submitted will be reviewed by the Department, subject to a peer review by an Architectural Historian hired by the County, at the expense of the applicant. Following this review the Department will determine if:

A. The residence is historically significant, and the Additions/Alterations conform with the SOI standards. The Application will then be forwarded to the HHC for review; (to Step 6)
B. If the residence is not historically significant, the application will be routed for Building Permit review. (to Step 5)

The requirement of the peer review will be at the discretion of Department Staff.

**Step 5: Regular Building Process (not historically significant determination)**
If the Department determines that the residence is not historically significant, based on the results of the HSA and/or peer review, the application will follow the regular building permit process for the development application submitted.

**Step 6: HHC Review of Application (historically significant determination)**
If the HSA and/or peer review determines the residence is historically significant, the Department will submits the assessment to the HHC consistent with Conditions O.1 and O.2 of the 2000 GUP. The HHC may:

A. Determine the residence is historically significant, recommend listing on HRI, and evaluate conformance of the alterations/ Additions with the SOI standards (Phase II)
B. Determine the residence is not historically significant, not recommend listing on HRI. If so, the application will be sent for a regular Building Permit Process. (Step 5)

**PHASE II: Listing on the HRI and Landmark Alteration Permit (LAP) process**
If HHC makes a recommendation to list the residence g to the HRI, the Department will initiate the listing process as per the Historic Preservation Code (Division C17). Any projects that include complete demolition will need to apply for a LAP once the building is listed, prior to the issuance of a Building Permit. If the application is for a complete demolition of the residence, a site-specific analysis of the impact and any feasible mitigation measures shall be prepared as part of the environmental review of the project.

---

1 Small Project is
1) Demolition or removal of non-contributing features, including, but not limited to, non-contributing additions, garages, accessory structures or incompatible, previously replaced windows, doors, or siding material.
2) Any undertaking that does not change exterior features, including but not limited to, re-roofing if the roofing material is compatible in appearance, color and profile to the existing or original roofing material.
3) Replacement of windows and doors if the proposed replacements match the existing or original windows and doors, and;
4) Addition of 500 square feet or less proposed for side or rear elevations.
5 As defined under the Secretary of Interior’s Guidelines.

---

San Juan Residential District

The process primarily is for homes in the neighborhood shaded in blue.
Small Project Permit Process for Buildings on the HRI or Potentially Historic Buildings in the Stanford San Juan Residential Neighborhood

February 5, 2020

Residences listed on the HRI list, or any potentially historic residence identified in the Historic Study, or any buildings that are 50 years old or more in the San Juan Residential Neighborhood, will follow the steps below for building permit submittal and require a review to determine if they qualify as a small project. A Small Project is any of the following:

1) Demolition or removal of non-contributing historic features, including, but not limited to, non-contributing additions, garages, accessory structures or incompatible, previously replaced windows, doors, or siding material;
2) Any alterations that do not change exterior features, including re-roofing if the roofing material is compatible in appearance, color, and profile to the existing or original roofing material;
3) Replacement of windows and doors if the proposed replacements match the existing or original windows and doors, and;
4) Addition of 500 square feet or less proposed for side or rear elevations.

Step 1: Stanford Faculty Staff Housing Office (FSH) Review

The FSH office staff will assess if the proposed project would be classified as a small project review, and assists the owner in conformance of the project design with the Secretary of Interior’s (SOI) Standards.

Step 2: Permit Application Submittal.

The applicant/agent shall submit a building permit application, a letter from Stanford FSH Office staff that determines the proposed project to be a small project, per one of the four small project categories. The letter shall identify what aspects of the project were reviewed for conformance with SOI standards, and list all the recommended design alternations/additions following the SOI Standards.

Step 3: Staff Review of Small Project Determination

Department staff will review FSH’s letter and submitted plans to verify that the project qualifies as a Small Project. Department staff will determine the following:

A. The proposed project is a Small Project, and the SOI standards have been followed; then the application will be routed through the regular Building Permit Process; or Department staff may determine that;
B. The proposed project is not a Small Project, and the applicant/agent and Stanford FSH staff will be notified that the project would require an HSA (if not on the HRI list), or may require a Landmark Alteration Permit if the residence is listed on the HRI.

A peer review may be at the discretion of County Staff if the SOI standards-based modifications may require an additional review.

Step 4: Regular Building Process

Once the Small Project determination is confirmed, the application will follow the regular building permit process.

---

Footnotes:

1 Features that do not contribute to buildings potential historic value (e.g. independent structures such as patios or sheds that were not built at the time of the original construction).

### Small Projects (for Buildings 50 years or older and not on HRI list)

Small projects can be:
- Demolition or removal of non-contributing features;
- Any undertaking that does not change exterior features;
- Replacement of windows & doors if the proposed replacements, and;
- Addition less than 500 square feet proposed for side or rear elevations;

These determinations will be confirmed by the County Planning Staff.

**October 21, 2020**

---

**NOTES:**

- For all County Building Permit application reviews, a Stanford Planning Department letter & stamp is needed
- A Landmark Alteration Permit for Interior remodel or external landscaping would be required if the interiors of the building/Exterior landscaping are part of heritage preserved by the landmark designation (e.g. a Study where the event of historic value took place)
- Applicants may obtain a landmark alteration permit by going through small project review if the proposed alteration or demolition is determined eligible for such review. After the application for small project review is deemed complete by the Department of Planning and Development, the department director or designee shall evaluate the application within ten working days to determine its eligibility for small project review. See: County Code Sec. C17-17 - Small project review.
- All proposed building projects are subject to the GUP.
